EDUCATION

The University of Texas at El Paso (UTEP)

El Paso, TX

B.S. Computer Science, Minor in Mathematics, GPA 3.80 / 4.00

Graduated May 2025

Relevant Coursework: Machine Learning, Data Mining, Database Systems, Secure Web-Based Systems, Software Engineering

Honors: UTEP Top Ten Senior (2025), NCWIT Collegiate Award Finalist (2025), SHPE STEM Poster Winner (2024), Great Minds in STEM Scholar (2023, 2024), Grace Hopper Scholar (2023)

TECHNICAL SKILLS

- **Programming:** Python, JavaScript / TypeScript, SQL, HTML / CSS, Bash
- **AI and LLM development:** Claude API, Claude Code, prompt engineering, multi-model routing, chatbot and proxy deployment
- **Web and data:** React, Next.js, Node.js, Firebase, full-stack prototyping; data analysis and nonparametric statistics (SPSS); Git, CI/CD
- **Spoken languages:** Bilingual English and Spanish

CERTIFICATIONS

- **Anthropic Academy:** AI Fluency: Framework & Foundations, Claude 101, Claude Code 101, Building with the Claude API, Introduction to Model Context Protocol, and Introduction to Agent Skills

EXPERIENCE

UTEP Institute for Applied AI Innovation (AAIL)

El Paso, TX

Research Assistant

October 2025 – Present

- Helped secure a \$180,000 AI consulting engagement with a regional manufacturer, a 7-month program running an AI readiness assessment and three pilots in parallel; draft the readiness assessment and support a retrieval-augmented generation (RAG) pilot by collecting documentation for its literature review.
- Build hands-on AI solutions in the institute's translational lab, a secure, compliance-checked UTEP environment for moving projects from concept to production; work built with Claude and Claude Code includes a chatbot proxy that routes requests across Claude models by task and cost, and a dashboard that automates Google Scholar alert tracking for faculty.
- Designed and delivered AI Connect, a four-module AI literacy course for non-technical adults 55 and older in the El Paso community, with a team of three sponsored by Microsoft; now lead the quantitative and qualitative analysis of course outcomes.

MIT Department of Earth, Atmospheric, and Planetary Sciences

Cambridge, MA

Summer Research Intern

June 2024 – August 2024

- Trained convolutional neural networks in PyTorch for climate forecasting and ran them on Bridges-2, a high-performance Unix / Linux cluster, benchmarking runtime and debugging job scheduling.

W. M. Keck Center for 3D Innovation

El Paso, TX

Undergraduate Research Assistant

January 2024 – May 2024

- Reverse-engineered the proprietary laser toolpath format for the Aconity 3D printer and built a Python tool that generates 243 sintering configurations from a CSV input, reducing a two-week manual workflow to 54 seconds.

Eaton, Thomas A. Edison Technical Center

Franksville, WI

Software Quality Assurance Intern

May 2023 – August 2023

- Built a Python test automation framework (Appium, WinApp Driver) for UI validation of ProView NXG controllers, replacing licensed tools for a projected \$45,000 in annual savings, and integrated it into the CI / CD pipeline for automated build and test execution.

LEADERSHIP

Society of Hispanic Professional Engineers (SHPE / MAES), UTEP Chapter

El Paso, TX

VP of Internal Affairs and Webmaster Chair

May 2022 – May 2024

- Support the planning of 6 meetings and 15 workshops per semester for 320+ members and led bilingual logistics for SHPE national conferences; maintained the chapter website (utepshpemaes.org).
