EDUCATION

The University of Texas at El Paso (UTEP)

El Paso, TX | Graduated May 2025

B.S. Computer Science (College of Engineering) | Minor: Mathematics

GPA: 3.80/4.00

- **Relevant Coursework:** Digital Systems & Design, Computer Architecture, Operating Systems, Parallel Computing, Secure Web-Based Systems, Database Systems, Software Engineering.
- **Honors:** UTEP Top Ten Senior (2025) | NCWIT Collegiate Award Finalist (2025) | SHPE STEM Poster Winner (2024) | Great Minds in STEM Scholar (2023, 2024) | Grace Hopper Scholar (2023).

TECHNICAL SKILLS

- **Process Control & Controllers:** Eaton ProView NXG switchgear controllers, controller firmware build pipelines, controller-level diagnostic and UI validation (Appium, WinApp Driver).
- **Automation & Workflow Development:** Python, Bash, CI/CD pipelines (FALCON/Jenkins-style), operational workflow automation, reverse-engineering of proprietary industrial file formats, CSV-driven parameter generation, PowerShell basics.
- **Systems & Operator Dashboards:** Full-stack web dashboards for tracking and decision support, VM provisioning on Windows and Linux (Ubuntu), HTTPS/TLS, OS patching, basic firewall, HPC/Unix cluster usage.
- **Soft Skills:** Customer service, clear written and verbal communication, cross-functional coordination with hardware and firmware engineering teams, bilingual English/Spanish.

PROFESSIONAL EXPERIENCE

Eaton – Thomas A. Edison Technical Center

Franksville, WI | May 2023 – August 2023

Full-Time Software Quality Assurance Intern

- Built a Python test automation framework (Appium, WinApp Driver) for UI validation of ProView NXG switchgear controllers, replacing Test Complete / Test Execute and projecting ~\$45,000 in annual licensing savings.
- Integrated the framework into FALCON, Eaton's CI/CD pipeline, enabling automated firmware build scheduling and controller-level diagnostic test execution.
- Worked in monthly cross-functional syncs with Schema, Hardware, and Firmware engineering teams to align on controller validation requirements and surface recurring defect patterns, directly analogous to process automation / plant engineering collaboration.

UTEP Institute for Applied AI Innovation

El Paso, TX | October 2025 – Present

Full-Time Research Associate

- Building a funding intelligence platform that automates NIH grants research, scoring 412+ NIH Guide opportunities against 39 UTEP department profiles to surface grant matches for faculty and innovation leads.
- Built a Google Scholar alerts dashboard that automates tracking of faculty publications and citations across the institute, replacing manual email-based monitoring.
- Automated operational guidelines and workflow development for the AAIL prototyping lab, full-stack web app standardizing concept-to-production with built-in compliance checks for security, branding, and commercialization.

W. M. Keck Center for 3D Innovation

El Paso, TX | January 2024 – May 2024

Part-Time Tech Support Assistant

- Reverse-engineered the proprietary .ILT laser toolpath format and built a Python CLI that automates parametric figure generation, replacing a two-week manual toolpath-location workflow with a 54-second pipeline that outputs 243 sintering configurations from CSV.

MIT – Earth, Atmospheric, and Planetary Sciences

Cambridge, MA | June 2024 – August 2024

Full-Time Summer Research Intern

- Operated HPC simulation pipelines on Unix/Linux clusters: benchmarked runtime, debugged job scheduling and I/O bottlenecks, and trained CNN models in PyTorch under physical-law constraints.

LEADERSHIP

SHPE/MAES – UTEP Chapter

El Paso, TX | May 2022 – May 2025

Director of Internal Affairs & Webmaster Chair

- Administered chapter website (utepshpemaes.org); co-planned 6 meetings and 15 workshops per semester for 320+ members, and led bilingual logistics for SHPE National Bootcamp and National Convention.
